MANIFEST — BRAND BLUEPRINT

Tagline: You have ideas, we build them
Secondary Tagline: Think It. See It. Screen It.

Core Mission: To provide a serene, low-pressure ecosystem where introverted visionaries can effortlessly offload their internal stories, world-building concepts, and media ideas, letting an integrated combination of AI and human experts build them into fully realized screenplays, visual assets, and videos.

1. Target Audience: The Imaginative Introvert

- **Psychographic Profile:** Deep thinkers, vivid world-builders, screenwriters, indie creators, and creative daydreamers who carry massive narrative universes in their heads.
- **Core Barrier:** Overwhelm around execution, high social friction, fear of judgment during pitch meetings, and fatigue from complex technical production pipelines.
- **Primary Value Proposition:** "You bring the ideas; we take care of the building." A judgment-free pipeline with on-demand, non-intrusive human assistance whenever creative or technical friction arises.
- **Communication Style:** Asynchronous, clear, gentle, and text-focused rather than demanding live, high-pressure presentations.

2. Visual Brand Identity & Aesthetics

- **Color Palette:** Soft dreamy violet blue primary, deep cosmic indigo secondary, soft nebula mauve accents, and crisp starlight white contrast.
- **Logo Concept:** A soft-glowing cosmic icon featuring a crescent galaxy, delicate stardust clusters, and a subtle brainwave/flow curve—symbolizing raw thoughts being structured into reality.
- **Stall & Physical Experience:** Designed as a quiet, ambient "Safe Haven Studio" featuring soft backlit violet acrylic walls, minimal ambient noise, private interaction nooks, and live human strategy desks.

3. How It Works: The Thought-to-Screen Engine

1. **Ambient Idea Capture:** Dump raw thoughts, unedited script drafts, audio ramble notes, or visual sketches into a distraction-free space.

2. **Automated Blueprinting:** The platform organizes raw ideas into structured scene beats, shot lists, character profiles, and mood boards.
3. **Asset & Video Building:** AI systems generate consistent visual assets, camera angles, soundscapes, and high-definition video drafts.
4. **Gentle Human Polish (On-Demand):** Empathetic creative strategists and technical artists step in asynchronously to review, refine, and polish complex scenes whenever requested.

4. Product Ecosystem & Human Support Model

- **The Sanctuary Workspace (App/Web):** A dark-mode, cosmic-themed creative workspace built to minimize overwhelm and maximize focus.
- **Human Intervention & Strategy Stations:** Dedicated support desks (at physical booths and embedded in the digital app) where specialists help translate vague ideas into concrete production outputs.
- **Asynchronous Mentorship Network:** Option to hand off rough drafts to human narrative specialists for written feedback, line editing, or production finishing touches.

5. Business Model & Pricing Structure

Tier	Features & Capabilities	Target User	Pricing
Sanctuary Free	Basic idea capture, visual mind-mapping, standard AI storyboarding.	Casual daydreamers & hobbyists	Free
Creator Pro	Full script-to-video building, 4K asset renders, character consistency engine, text-based human strategy support.	Indie authors, solo filmmakers, introverted creators	~$24 / month
Studio & Co-Pilot	Dedicated 1-on-1 human builder/narrative consultant, custom scene polish, priority rendering, commercial rights.	Serious indie screenwriters & digital artists	~$79 / month

6. AI Generation Prompts & Visual Assets

Logo & Brand Mark Prompt

"A minimalist, modern vector logo for a brand named 'Manifest'. Flat design, soft dreamy violet-blue gradient (#6C5CE7 to #74B9FF) against a clean dark indigo background. The icon features a stylized crescent galaxy blending smoothly with a flowing brainwave line, surrounded by delicate, glowing stardust particles. High quality, ultra-clean vector graphics, sleek typography underneath reading 'MANIFEST', professional branding presentation."

Physical Exhibition Stall / Booth Prompt

"Wide-angle architectural rendering of an interactive exhibition booth stall for a technology brand called 'MANIFEST'. Soft dreamy violet-blue LED backlighting with smooth glowing curved counters and frosted glass panels. Sleek illuminated header sign displaying 'MANIFEST' with a glowing galaxy icon logo, and the tagline underneath reading 'YOU HAVE IDEAS, WE BUILD THEM'. The stall features interactive touchscreen workstations and a warm, inviting counter marked 'HUMAN INTERVENTION & STRATEGY STATION' staffed by friendly creative consultants."

Digital App UI / Workspace Concept Prompt

"Sleek, modern UI mockup of a desktop application named 'Manifest'. Dark mode interface with a soft violet-blue and deep indigo accent palette. A clean split screen showing a raw voice/text thought dump on the left converting into a structured cinematic storyboard, timeline, and 4K character blueprint on the right."
